Portfolio

SUMMARY

Full-stack developer who built and launched a React Native SaaS app used by 20+ students, featuring paid subscriptions, Razorpay integration, and an admin dashboard. Experienced shipping production-ready web and mobile applications using React Native, Next.js, Node.js, and Firebase.

EDUCATION

CMR Institute of Technology, Bangalore	2024 – 2028
<i>B.E. in Computer Science & Engineering (Data Science)</i>	CGPA: 8.86
Kendriya Vidyalaya No.1 Panambur, Mangalore – Class XII (CBSE)	87% (2023)
Kendriya Vidyalaya Pazhavanthangal, Chennai – Class X (CBSE)	91.6% (2021)

TECHNICAL SKILLS

Languages:	TypeScript, Python, JavaScript, SQL, C
Frontend:	React Native (Expo), Next.js 15/16, React, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, Cloud Functions, JWT Auth, Web Scraping
Databases:	Firebase (Auth + Firestore), Supabase (PostgreSQL), MongoDB, MySQL
AI/ML:	Google Gemini API (text + vision), YOLO/Roboflow, OpenCV, MediaPipe
Tools:	Git, GitHub, Vercel, EAS/Expo, Postman, Figma, Razorpay, Linux

TECHNICAL EXPERIENCE

SahayakAI – Crisis Response Platform	Apr 2026
<i>Frontend Lead & AI Integration (Team of 2)</i>	Bangalore, India
- Architected the frontend in Next.js 15 and integrated Gemini 2.5 Flash API for multilingual emergency classification across 12 Indian languages with sub-2s response time. - Implemented real-time Firestore listeners for staff coordination dashboard with optimistic UI updates and offline fallback.	
INNOVATEX 4.0 Hackathon – Presidency University	2025
<i>Full-Stack Developer</i>	Bangalore, India
Built 2 working prototypes in 9 hours: LitterLens (YOLO-based satellite garbage detection with BBMP ward mapping) and Syntrix (city-scale resource optimization with 14 REST endpoints for 20.4M population).	

PROJECTS

UniTrack – Mobile Attendance Tracker <i>React Native, Expo, Firebase, Razorpay, Gemini API</i>	Live GitHub
---	---

Sole Developer – owned end-to-end

- Built and launched a React Native SaaS app serving **20+ students** with paying subscribers, automated attendance tracking, and premium subscription management via Razorpay.
- Integrated Razorpay subscriptions with secure webhook verification, payment reconciliation, and automated premium feature activation.
- Built an internal admin dashboard for subscription management, revenue monitoring, and user analytics using Firebase Cloud Functions.
- Automated timetable extraction from photos using Gemini API vision, reducing setup time from 15 min to 30 sec.

goIRL – Tech Events Discovery Platform <i>Next.js 16, Supabase, MapLibre GL, Vercel</i>	Live GitHub
--	---

Sole Developer – designed and shipped without a designer

- Built a platform aggregating tech events from multiple sources into a single searchable interface with 3D map view, reducing event discovery friction for developers.
- Implemented Supabase magic-link auth, admin moderation panel, PostgreSQL full-text search, and calendar export (.ics).
- Deployed on Vercel with automated daily ingestion pipelines via cron jobs from MLH, Lu.ma, and Devfolio APIs.

LitterLens – Satellite Garbage Detection <i>React Native, Expo, YOLO/Roboflow, Firebase</i>	GitHub
--	------------------------

- Built a mobile app that detects illegal garbage dumps from satellite imagery using YOLO via Roboflow; reduced government notification time from days to under **30 seconds**.
- Implemented color-coded severity mapping with BBMP ward-level pins and WhatsApp/Email deep links for instant government alerts.

Syntrix – City-Scale Resource Optimization <i>Node.js, Express, React Native, Python</i>	GitHub
---	------------------------

- Built a simulation engine for water, electricity, and waste distribution across 9 Bangalore zones (**20.4M population**) with **14 REST API endpoints** and AI demand prediction.
